

Modular Hybrid PVD / PECVD Coating System

Tribological Coatings Supporting Industries in Becoming Greener

Multi-purpose PVD Coater for Hard and Tribological Coatings

Multifunctional Coatings

- Low Friction coatings to reduce energy consumption
- Wear resistance
- Self-Lubricant to reduce damage
- High Corrosion resistance
- Thermal barrier

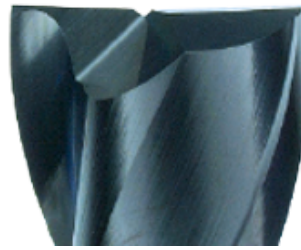

Benefits / Advantages:

Low running costs
Adjustable processes
Open source recipe editor
Full technology & service support
Scalable technologies

4 Coatings Portfolio in 1 Coater

- One for components
- One for forming cutting tools
- One for plastic molding
- One for forming tools

The Tailor-made solution for Hard and Tribological coatings

4 coatings Portfolio for:

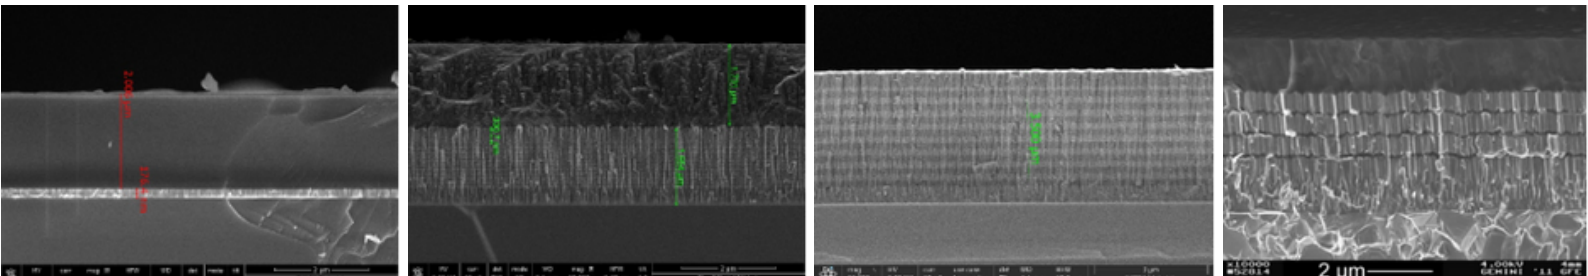

Properties optimization

- High hardness
- Low coefficient of friction (0.02 – 0.15)
- High corrosion resistance
- Great adhesion to substrate material
- Fretting resistance
- Adhesive wear resistance
- Self-lubrication in dry wear conditions
- Excellent release properties
- Biocompatibility

Select the best process which offers the best performance for your applications

*Tribological and hard coating structure

	MpC500	MpC800	MpC1000	MpC1200
Useful Volume	Ø 500 x 500	Ø 640 x 650	Ø 800 x 650	Ø 800 x 1000
Load	200 kg	500 kg	600 kg	800 kg
Nb Magnetrons	2	4	4 or 5	4 or 5
